Library Navigator

Library Navigator is a navigation tool that guides users the location of books and rooms in the library. This tool provides two different navigation which are book and room navigators. This navigator will guide users beginning from the circulation counter until the location of the books or rooms. The users just need to find the book call number through Web OPAC then using the library navigator to find the location. For identifying the rooms, the users just have to click the room navigator menu in Library Navigator.

Click “library.utm.edu.my”
Choose “eApplication”

Click “Laman Hikmah Navigator”
Choose “Book Navigator” / “Room Navigator”
