SMART RESOURCE TRACKING AND TRACING SYSTEM (SRTTS)

- SRTTS is able to track and trace the exact location of resources such as books, journal article, CD, manuscripts, theses etc.
- Detectors were installed in each of the resources and will be auto-updated in the system once removed from the shelf
- Provides an algorithm to detect the exact location of the hidden or misplaced resources

OBJECTIVES
- To enhance library users’ experiences.
- To create better library engagement.

BENEFITS
- Increase productivity.
- Increase organisational efficiency.
- Superior customer service.
- Maximize utilization of resources.
- Time saving

NOVELTY
- Increase the value of ROI and ROC.
- Real-time update and reporting
